

```
Enter a word or phrase, and this program will identify if it's a palindrome: civic
Exception in thread "main" java.lang.Error: Unresolved compilation problem:
    Syntax error on tokens, Name expected instead

    at Mastery.Palindrome.isPalindrome(Palindrome.java:11)
    at Mastery.Palindrome1.main(Palindrome1.java:25)
```

```
string = string.replaceAll(" ", "");
```

- It's case sensitive as the user gives the word the word are classified by characters for the program to read the the characters are for lowercase letters.

```
string = string.replaceAll(" ", "").toLowerCase();
```
