```
Error: Could not find or load main class Mastery.CourseGrades
Caused by: java.lang.ClassNotFoundException: Mastery.CourseGrades
```

-

```
System.out.println("\nGrades for all students:");
for (int num1 = 0; ) {
    System.out.print("Student " + (num1 + 1) + ": ");
    for (int num = 0; ) {
        System.out.print(GRADES1[num1][num] + " ");
    }
}
```

- Added the missing closing brace for the class.
- Fixed the infinite loops by adding loop control variables.

```
for (int num1 = 0; num1 < number; num1++) {
    System.out.print("Student " + (num1 + 1) + ": ")
    for (int num = 0; num < NUMBER; num++) {
```
